WEEK TEAM/LEADER
WEEK 3 – WEEK ENDING August 21,2026
STUDENT NAME : Prince Vyas

WORK COMPLETED
- Built cart with add item and quantity change
- Built checkout: order type (dine-in, takeaway, counter pickup, hostel/workstation delivery), location and service time
- Built order status tracking screens (placed to completed/refunded)
- Built order search and filter by date, user, status, counter, order number
- Built receipt/voucher view and cancel / partial-cancel options

Evidence: [commit link / test / design / dataset / demo]

CHALLENGES/RISKS
- Real-time status refresh – polling used, load being checked – **[AMBER]**
- Cutoff time errors must be shown clearly to user – **[AMBER]**
- Kitchen console layout still being refined – **[GREEN]**

HELP NEEDED
Which order types and cutoff times apply for this institution? Need by [date].

INTEGRATION AND COLLABORATION
Checkout calls order servlets; kitchen console receives orders; JSON for order agreed with Logic/DB.

COMMON KPI EVIDENCES
Cart/checkout response time; status refresh delay; UI tested; demo video.
