WEEK TEAM/LEADER
07-08-2026
Suraj Rathod

WORK COMPLETED
- Developed responsive frontend pages using HTML, CSS, and JavaScript.
- Created Login, Register, Home, About, and Contact pages.
- Designed Student, Staff, and Manager dashboard interfaces.
- Implemented JavaScript for menu and user interactions.
- Organized project structure with assets, CSS, and JavaScript files.

CHALLENGES/RISKS
- Maintaining a consistent UI design across all frontend pages.
- Managing navigation and JavaScript across multiple HTML pages.
- Backend APIs are still under development, so the frontend currently uses dummy data.
- Ensuring responsive layouts work correctly on different screen sizes.

HELP NEEDED
- Backend API endpoints and response formats for integration.
- Feedback on overall UI consistency before connecting with the backend.

INTEGRATION AND COLLABORATION
- Frontend pages are organized for easy integration with Java Servlet and JSP backend modules.
- JavaScript files are separated according to individual modules for easier maintenance.

COMMON KPI EVIDENCES
- Responsive UI implemented for desktop, tablet, and mobile devices.
- 100% completion of assigned frontend pages with HTML, CSS, and JavaScript.
- Client-side form validation and navigation implemented across the assigned modules.

NEXT WEEK COMMITMENTS
- Complete the newly assigned frontend module as per project requirements.
- Enhance UI consistency and responsiveness across all pages.
- Fix UI issues based on mentor feedback and team review.
- Improve JavaScript functionality for better user experience.
- Prepare the frontend for future integration with other project modules.

Note: Leader Submits; all four members view and actions, confirm accuracy before submission
