WEEK TEAM/LEADER
WEEK 1 – WEEK ENDING August 8,2026
STUDENT NAME : Suraj Rathod

WORK COMPLETED

- Built registration page (mobile / email / employee ID / student ID) with field validation
- Built login and logout screens with session handling and error messages
- Created role-based dashboards and menus for all 8 roles (customer to administrator)
- Built profile page (name, department, contact, dietary preference, default pickup/delivery location) and views for order history, invoices, complaints, feedback status
- Built admin screen to activate, suspend, reset and delete accounts

Evidence: [commit link / test / design / dataset / demo]

CHALLENGES/RISKS

- Different ID types need different validation rules – tried per-type patterns + policy toggle – **[AMBER]**
- Hiding UI by role is not security – server-side check required, agreed with Logic team – **[AMBER]**
- Responsive layout for 8 dashboards still being polished – **[GREEN]**

HELP NEEDED
Which ID types (mobile, email, employee ID, student ID) are allowed under organization policy? Need decision by [date].

INTEGRATION AND COLLABORATION
Pages call register / login / profile / admin servlets; JSON field names agreed with Logic and DB teams. Open: session token format.

COMMON KPI EVIDENCES
Form validation response time; page load time; commits pushed daily (CI); demo of all screens recorded.
