Student Team Weekly Report – One Page Template (To be Submitted every Thursday 10.00PM)

PROJECT/FEATURE
Canteen Order Management System - Frontend UI Development

TEAM & MENTOR
[TEAM ID]
-Rudragouda patil

WEEK TEAM/LEADER
[13-08-26]
[Gayatri Kompale]

WORK COMPLETED

- Implemented frontend UI for adding/removing cart items and modifying item quantities before checkout.
- Created Order Status UI to represent the lifecycle: Placed → Accepted → In Preparation → Ready → Out for Delivery → Delivered/Completed, with cancellation/refund states where applicable.
- Developed the Payment & Billing frontend with payment-method selection

CHALLENGES/RISKS

- Dynamic cart updates – Quantity and total-price changes need JavaScript handling; tested through client-side interactions
- Maintaining a common checkout UI for dine-in, takeaway, pickup, and delivery required conditional fields and consistent navigation.

HELP NEEDED

- Backend API endpoints and response formats for integration.
- Feedback on overall UI consistency before connecting with the backend.

INTEGRATION AND COLLABORATION

- Structured the Cart, Checkout, Order Tracking, Order History, and Payment UI for integration with Java Servlet/JSP backend modules.
- Coordinated with the team regarding order lifecycle, payment states, and required data fields.

COMMON KPI EVIDENCES

- Responsive UI implemented for desktop, tablet, and mobile devices.
- 100% completion of assigned frontend pages with HTML, CSS, and JavaScript.
- Client-side form validation and navigation implemented across the assigned modules.
- Existing frontend design consistency and responsiveness maintained across newly developed pages.

NEXT WEEK COMMITMENTS

- Complete the newly assigned frontend module as per project requirements.
- Fix UI issues based on mentor feedback and team review.
- Prepare the frontend for future integration with other project modules
- Implement dynamic Order Status display using backend response
